

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress to ensure that the project is on track.

5. The final step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals and identifying any areas for improvement.

SEARCH NOTES (INCLUDING SEARCH STRATEGY)		
	Date	Exmr. EXMR
Talked to Dave Wiley (AU 2143). He said case looks like it belongs in class 710 (AU 2182)	10/15/02	ASJK
Talked to Paul Fodinswe (AU 2125), Rupal Dhara (AU 2189), Sue Lao (2126) and Elwood Park (2182) No one would accept the transfer, even though it really doesn't belong in 2125, so I am going to examine it.	1/29/03	ASJK
